September 2015 - June 2019

OBJECTIVE

To display how I will be an asset to your team with the skills and experience that I have developed over my life.

SUMMARY

Since my formative years, I have always been proficient with technology. Its possibilities have fascinated me and brought me joy to learn about their underpinnings. When it came time to choose a career path, I took 1 year to volunteer for a non profit organization known as isha foundation. Their efforts provide education to rural Indian children, food and healthcare to the rural tribes of Ikkaraibolluvampatti, empower locals with regenerative agriculture and economically sustainable crop planning, among many more activities. I met so many people of such diverse background, where many do not speak the same native language as me. I was assigned a leadership position, where every week I was tasked with explaining our standard operating procedures to new

Effective, efficient Communication

Leadership communication

Ability to establish strong relationships

Maintaining balance in intense situations

HTML, CSS, Javascripts

Ability to quickly grasp a new subjects

Openly receptive and supportive of criticism

An ever growing desire to improve myself and others

Solid and foundational

understanding of how to teach others a skill

Ability to reliably captivate, develop and discover passion within others

I'm good at maintaining a positive atmosphere

Making others feel heard, welcome and valued

LANGUAGES

English

volunteers. I often encountered situations where I needed to explain to people who spoke only a small bit of English. Performing this act every week for my year of service taught me the power and tricks of effective communication. I learned to listen keenly and observe if, and how much of what I say someone understands. This skill allows me to easily work with new individuals and be flexible in a group setting. To allow everybody's contribution to be heard is of utmost importance. I feel that I will be a perfect fit for this engineering apprenticeship, keeping an emphasis on ensuring my teammates feel valued for their contributions and welcome to explore novel solutions with me!
